

**PLANNING AUSTRALIA: AN OVERVIEW OF URBAN AND REGIONAL PLANNING**

SECOND EDITION

**Editors**

Susan Thompson (University of New South Wales)  
Paul J. Maginn (University of Western Australia)

This book provides a comprehensive view of the major issues and principal activities which occupy planning practitioners today. The conceptual framework of the text is underpinned by the tenets of sustainability and social equity, reflecting the breadth of the authors' planning expertise, theoretical positions and practice experience. The book defines and contextualises planning in terms of its theoretical, ideological and professional foundations. The history of the discipline, its relationship to broader governance structures and its legislative framework are canvassed.

The first edition of Planning Australia was published in 2007, winning both the NSW State and National Planning Institute Awards.

This second edition features three new chapters – urban design, transport planning and healthy planning. New case studies and discussion points are included from all over Australia.

Feb 2012 • RRP \$79.95 • 400pp • Paperback • ISBN 9781107696242
